

## BUTTERFLY STITCHES

### DESCRIPTION

The butterfly stitches are suitable for the safe and quick closure of minor cuts or lacerations. The wound closure strips can also be used as an alternative to sutures or staples, as the risk of scarring is reduced.

The risk of infection is also reduced as there are no needle puncture marks. Once the wound has healed, the wound closure strips can be easily removed. The butterfly stitches are available in different sizes.

### PRODUCT DETAILS

- Butterfly stitches
- Atraumatic wound closure
- For the treatment of minor cuts or lacerations
- Quick and easy wound closure
- Also for post-operative stabilisation of wound suture
- Water-repellent and tension-resistant
